Gene Zinovchuk

DIRECTOR - DIGITAL FORENSICS

PROFESSIONAL PROFILE

Mr. Zinovchuk is a professional with 22 years of experience in Digital Forensics, eDiscovery, and litigation support, with previous computer programming and data recovery experience. He helps lawyers and their clients collect, preserve, analyze, and understand digital evidence so that they can uncover the truth and make intelligent decisions.

Digital forensics has been Mr. Zinovchuk's primary focus since 2003. He has held manager and senior level examiner roles with corporate in-house teams, national consulting firms, national and global eDiscovery providers and boutique forensic investigation firms. In these various roles he has:

- Forensically collected and preserved data from thousands of electronic devices: Windows PCs, Macs, mobile phones, tablets, USB media, DVDs, backup tapes, servers, email, cloud storage, and websites.
- Carefully followed evidence handling best practices, including but not limited to . . .
 - Hardware and software write blockers to prevent spoliation of the evidence.
 - Evidence file containers to prevent cross-contamination as well as to ensure the integrity of the data.
 - Hashing to create a digital thumb print of the data for authentication purposes.
 - Chain of custody documentation to assist with authentication of the evidence.
 - Encryption technology to ensure the security of digital evidence in-transit.
 - Working copies for analysis instead of operating directly on the original copy of the evidence.
- Processed and analyzed digital evidence in close to a thousand cases in the areas of theft, workplace harassment, spoliation, breach of contract, fraud, internal investigations and family matters.
- Experienced in many forensic and eDiscovery software packages: EnCase, X-Ways Forensics, FTK, Cellebrite UFED/Physical Analyzer/Inspector/Digital Collector, Magnet Axiom, Oxygen, Nuix, PageVault, X1 Social Discovery, Aid4Mail, Forensic Email Collector, Elcomsoft, Sumuri Recon/Paladin, Passware.
- Performed all stages of the EDRM (Electronic Discovery Reference Model): Identification, Preservation, Collection, Processing, Review, Analysis, Production, and Presentation of electronic evidence.
- Drafted accurate and succinct forensic reports explaining findings in a way that a nontechnical reader can understand.
